

The Wilson Reading System® (WRS) is a structured literacy program based on phonological-coding research and Orton-Gillingham principles, WRS directly and systematically teaches the structure of the English language. Through the program, students learn fluent decoding and encoding skills to the level of mastery. From the beginning steps of the program, students receive instruction in:

- Phonemic awareness
- Decoding and word study
- Sight word recognition
- Spelling
- Fluency
- Vocabulary
- Oral expressive language development
- Comprehension

Students who may or may not have a language-based learning disabilities will benefit from systematic, structured literacy approach to reading instruction.
